

The District's newly developed reporting system will allow students, parents, and any community member to anonymously report bullying. It will be made available to all schools for the purpose of giving bystanders (students witnessing bullying but unsure what to do about it) and targets (victims of bullying) the chance to stop bullying without fear of repercussions. This system was designed in an effort to provide bystanders and victims with a safe tool for reporting bullying. It will also help identify hot spots for staff to monitor and deter bullying.

Please complete the District [Anonymous Bullying Reporting Form](#) if you know of an act of bullying that you would like to report.

Each school in the District utilizing this form will have a Tip Box located outside of the main office. The building principal will inform their parents, students and staff of the reporting form and where the Tip Box is located, as well as the individual(s) at the school responsible for following up on the form.

BE BOLD BAN BULLYING
